HACKING related coding basic

SECURE Software

SOFT DEV   do NOT keep Security up to date

Library Tend NOt to be updated to the latest versions

* What Happens In Code When Hacking
Command Injection
XSS
CSRF
SQL Injection   ⌐— Later workshop
Buffer overflow

Command injection

Demo

Testing

easy   DVWA
explain the code en Test it!

Advanced   Deploy LAMP with UBUNTU

* PHP:
eval is execution code, which Can Be exploited.
everything within "eval (exploit code);"
